

- 1) Solve the inequality $7x + 5 \geq 5x - 7$
and show the solution on a number line

- 2) Expand and simplify $3(2a - b) + 3(4b - 3a)$

- 3) Work out $4\frac{1}{6} \div 2\frac{3}{5}$

- 4) Work out 0.34×3.5

- 5) Work out $2.07 \div 0.6$
